Los Angeles, CA | +1 (909) 568-3549 | marissa.klymkiw@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Senior Product Designer working at the scope of a *Staff Product Designer*, with 15+ years designing consumer web and enterprise platforms. Expert in interaction design, information architecture, design systems, accessibility, and AI-assisted prototyping. Builds evidence-driven journeys that improve trust, conversion, and product quality. At UCLA I restructured a slipping build around a role-based access model five weeks from the deadline, aligned four infrastructure teams on one shared structure, and shipped a coded reference engineering built from instead of making screen-by-screen decisions, resolving 12 edge cases before they reached implementation. I welcome ambiguity that arrives as undefined problems, and answer with structure the whole org can build from.

WORK EXPERIENCE

UCLA | *Senior Product Designer* | Remote | **June 2024 - Present**

- Led role-based access application design that cut registration approval from 2-3 business days to under 24 hours, reduced support tickets 40%, and achieved 80% self-service completion for a 200–500 requests/month queue.
- Restructured a slipping development build around a role-based access model five weeks into the pilot, aligning Network, Business IT Products, and Digital Foundry on one shared structure and resolving 12 edge cases upstream before engineering reached them.
- Delivered design as delivery infrastructure rather than screen polish: a coded prototype reference and Storybook library of 105 stories with zero accessibility violations, covering 14 device paths and 35 reusable components, produced with Claude Code and Claude.ai.
- Connected 3 product managers and 10 teams across campus around a single end-to-end UX vision for access, validation, and reuse, piloting the extension of UCLA's design system from editorial pages into application workflows.
- Established design operations, governance, and a shared end-to-end UX vision adopted across central IT; and launched campus-wide AI Ignite Labs for responsible AI prototypes.
- Mentor designers and researchers and coach cross-disciplinary partners in human-centered and accessible design practice.

Indeed.com | *Senior UX Designer* | Remote | **February 2022 - June 2024**

- Increased weekly engagement 60-100% with feedback running 3:1 positive by designing the sourcing analytics that shipped in Indeed's paid professional subscription as two connected views, leading with a plain-language performance read instead of another dense dashboard.
- Aligned three analytics teams on a shared two-year product direction by auditing 31 overlapping jobs to be done across three analytics products, then planning and facilitating a cross-functional workshop with PMs, analytics leadership, architecture, engineering, research, and customer success.
- Narrowed jobs to be done into a ranked delivery focus by facilitating a three-day offsite using an employer accelerator framework, a return-on-effort metrics framework, and RICE sizing, surfacing sourcing analytics as the top opportunity.
- Mentored product designers, led design critiques, and drove adoption of Jobs-to-be-Done and evidence-based design methods across multiple teams.

University of Southern California | *Senior UX Designer* (Oct 2021 - Jan 2022), *UX Designer* (Nov 2019 - Sep 2021) | Los Angeles, CA

- Improved design consistency and engineering handoffs across multiple USC products by creating UX strategies, vision documents, and design system artifacts adopted university-wide.
- Shaped product roadmaps grounded in user insight by facilitating workshops and research sessions that aligned stakeholders and synthesized findings.
- Partnered with cross-functional teams to uncover user needs and translate them into intuitive, student-centered digital experiences.
- Strengthened the university's internal UX capability by mentoring student designers and coaching contractors in inclusive, human-centered design practice.

SoCalGas | *Senior UX Designer* (Jan 2018 - Nov 2019), *UX Designer* (Jan 2016 - Jan 2018), *Web Designer* (Dec 2013 - Jan 2016) | Los Angeles, CA

- Grew monthly mobile sessions by 23% and reduced call-center costs by \$840K annually by championing a multi-year, mobile-first modernization of SoCalGas.com and the My Account platform.
- Helped customers identify cost-saving opportunities by leading the Ways to Save initiative, integrating third-party energy efficiency data into the digital ecosystem.
- Designed and implemented a unified information architecture merging the marketing and account-management websites.
- Led a five-member UX/UI team and guided cross-functional voice-of-the-customer sessions across an organization of 8,000 employees.

Arcadian Home | *Web Designer* | Chino, CA | April 2011 - December 2013

- Increased conversion and brand consistency by redesigning the e-commerce UI and responsive templates.
- Designed, coded, and coordinated weekly and monthly email newsletters to over 18,000 subscribers using MailChimp.

SKILLS

- **Design leadership:** Design strategy, design operations, UX governance, facilitation, design critiques, mentoring and coaching, hiring, cross-functional alignment, stakeholder management, roadmapping
- **Product design:** Design Systems, UX Design, Product Thinking, Experience Strategy, Interaction Design, Information Architecture, Visual Design, Rapid Prototyping, Iconography, Design Tokens, Storyboarding, Responsive Design, Human-Computer Interaction, Motion Design, Service Design, Accessible Design, Sketching, Wireframing, Iterations, Content Design, Conversation Design, Innovation Frameworks, Systems Thinking, Micro-interaction Design, UI Design, Product Design, User Testing
- **Research:** Jobs-to-be-Done, user interviews, usability testing, heuristic evaluation, competitive analysis, accessibility audits, tree testing, card sorting, journey mapping, RICE prioritization, design thinking
- **Accessibility:** WCAG compliance, accessibility annotation, inclusive design, contrast and focus-state standards, accessibility review
- **Tech and AI:** Claude Code, Claude.ai, ChatGPT, KiroCrew, AI-assisted prototyping, agentic AI interaction patterns, HTML, CSS, JavaScript, Storybook, Visual Studio Code, Version Control (Git), Flora.AI
- **Tools:** Figma, FigJam, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Mural, Miro, Optimal Workshop, Jira, Jira Product Discovery, Confluence, Trello, Visio, InVision, Drupal, WordPress CMS, Webflow, Salesforce, GitHub

EDUCATION

Brandman University | *Master of Business Administration (MBA)* | Irvine, CA | 2022

Cal Poly Pomona | *Bachelor of Fine Arts in Graphic Design* | Pomona, CA | 2011

CERTIFICATIONS AND TRAINING

UX Design for Agentic AI, *Human Centered AI Institute (Maven)*, August 2026

Advanced Claude Code for Designers, *Human Centered AI Institute (Maven)*, June 2026

Enterprise Design Thinking Co-Creator, *IBM*, July 2020

UX Certified, *Nielsen Norman Group*, January 2019

Business Analysis, *UC Irvine Extension*, 2018

Design Leadership, *Cooper Professional Education*, 2017

User Experience and Human-Centered Design, *Cal State Fullerton*, 2015
